

## MATERIAL INFORMATION SHEET

NFPA 704: Health 0 (Ratings use five divisions from 0 to 4:  
Flammability 1 0 = No special hazard; 4 = Severe hazard)  
Reactivity 0

Issued By: F. Joseph Ehrhardt, Ph.D.  
Vice President – Quality, Research and Development

### I. Product Information

- A. Product Name: **Congoleum AirStep Advantage, AirStep Evolution and AirStep Plus resilient flooring with fibrous felt inner layer and dense flexible vinyl composite backing.**
- B. Description and Ingredient Information: These sheet products are intended for use in residential environments. They are produced in a variety of designs, colors and surface finishes.
- C. These products represent no known formaldehyde hazard.

### II. Miscellaneous Information

- A. Each of these products is classified as an “article” according to Title 29 of the Code of Federal Regulations OSHA Hazard Comm. Standard 1910.1200(c). Congoleum products are formulated to pass ASTM Specification F-1303. Each product is manufactured to Congoleum Finished Material Specifications for that product classification. They are formulated to pass standard flammability tests.
- B. Removal of existing, installed resilient floor covering may result in exposure to asbestos materials.

The Resilient Floor Covering Institute warns: Do not sand, dry sweep, dry scrape, drill, saw, bead blast, or mechanically chip or pulverize existing resilient flooring, backing, lining felt, asphaltic “cutback” adhesive or other adhesive. These products may contain asbestos fibers and/or crystalline silica. Avoid creating dust. Inhalation of such dust is a cancer and respiratory tract hazard. Smoking by individuals exposed to asbestos fibers greatly increases the risk of serious bodily harm.

This information applies strictly to Congoleum products; other manufacturers should be contacted for information on their products.

This Material Information Sheet is provided in lieu of a Safety Data Sheet. An SDS is not required for “articles” as defined by the OSHA Standard 1910.1200(c).
